PROFILE

First-year engineering student with a strong interest in cybersecurity. Currently exploring foundational programming and system-level tools, with hands-on experience in Java-based GUI development and web design. Passionate about building technical skills through real-world practice and security-oriented challenges.

PROJECTS

Movie Booking System

2025

Developed a GUI-based movie ticket booking application using Java Swing and MySQL, handling seat selection, scheduling, and data storage.

Technologies Used: Java, Java Swing, MySQL

Role: Solo project – handled both GUI and database integration.

Project Link: <https://github.com/Harikrishnanspillai/movie-booking-system>

Personal Portfolio Website

2025

A fully responsive personal portfolio website built to present my background, technical skills, and project work in a clean, accessible format.

Technologies Used: HTML, CSS

Role: Solo project – designed and coded the entire site from scratch.

Project Link: <https://harikrishnanspillai.github.io/>
